### PROFILE

I have had a lifelong involvement with the ocean, sailing and working on a wide variety of vessels, ranging from trailer boats to superyachts. I am a self-motivated and easy-going person with a real passion for sailing and working as part of a team. For the last 9 years, I have worked as a Marine Technician on the marine repair industry in Sydney where attention to detail, problem solving and working in a timely manner are paramount.

### MARINE QUALIFICATIONS

- \* RYA Yachtmaster Offshore
- \* STCW95
- \* Marine Mechanic Trade - TAFE Institute. Sydney, Australia – 2009/2012.
- \* Qualified advanced PADI Diver
- \* Diploma of Automotive Technician CEFET (Centre of Education and Technologies - Brazilian TAFE, 2007/2008.)
- \* Certificate in Aquatic Rescue (Bronze Medallion, Surfing Life Saving Australia, '09)

### WORK EXPERIENCE

#### Jul '15 – Sep '17 • Onboard Marine Services

- \* On this company I have worked as subcontractor marine technician servicing a wide range of engines – from small outboards (15 hp) to large diesels (450 hp).
- \* Most of the work was done on luxury yachts that present state of the art tech-

nology. As a Volvo dealership I performed maintenance on the latest engines and had great exposure to electronic management systems

#### Jan '15 – Jul '15 • Allweld Mobile Welding

- \* To develop skills that could complement my career as a mechanic I worked as a stainless fabricator for 6 months.

\* Most of the work consisted on serving the local marine service providers with everything ranging from rails to exhaust system.

#### Fev 2013 – Nov 2014 • Newport Marine Service

- \* This company specializes on diesel engines and I was able to consolidate my skills after my training. As dealer of major brands as Cummins and Caterpillar I

was able to take part on many repowers. \* As complex projects those repowers involved working alongside other professionals as electricians and shipwrights.
